When we talk about the smartphone such as iPhone 7, Apple iPhone 7 Plus and etc we can't have a great user experience because our iPhone doesn't have the necessary drivers. On the other hand, when we talk about Android smartphones we can't have a good and smooth user experience as we can't have enough drivers installed on the device. In addition to that, drivers for iPhone and Android smartphones are available on the market. There are thousands of smartphone manufacturers that make different kinds of smartphones that are running on different operating systems. For example, there are hundreds of smartphones are running on Android smartphones and there are thousands of smartphones are running on iPhone operating system. The smartphones operating systems such as Android OS, Windows OS and iOS are developed in the regular time.
